

Linking Covid N19 policy and practices with resources and professionals to generate timely, actionable information.

There's one thing you can control in a crisis: The information you use.

TTSI's response to the pandemic challenge is a Platform-as-a-Service solution designed to advance strategic organizational objectives of LGU's:

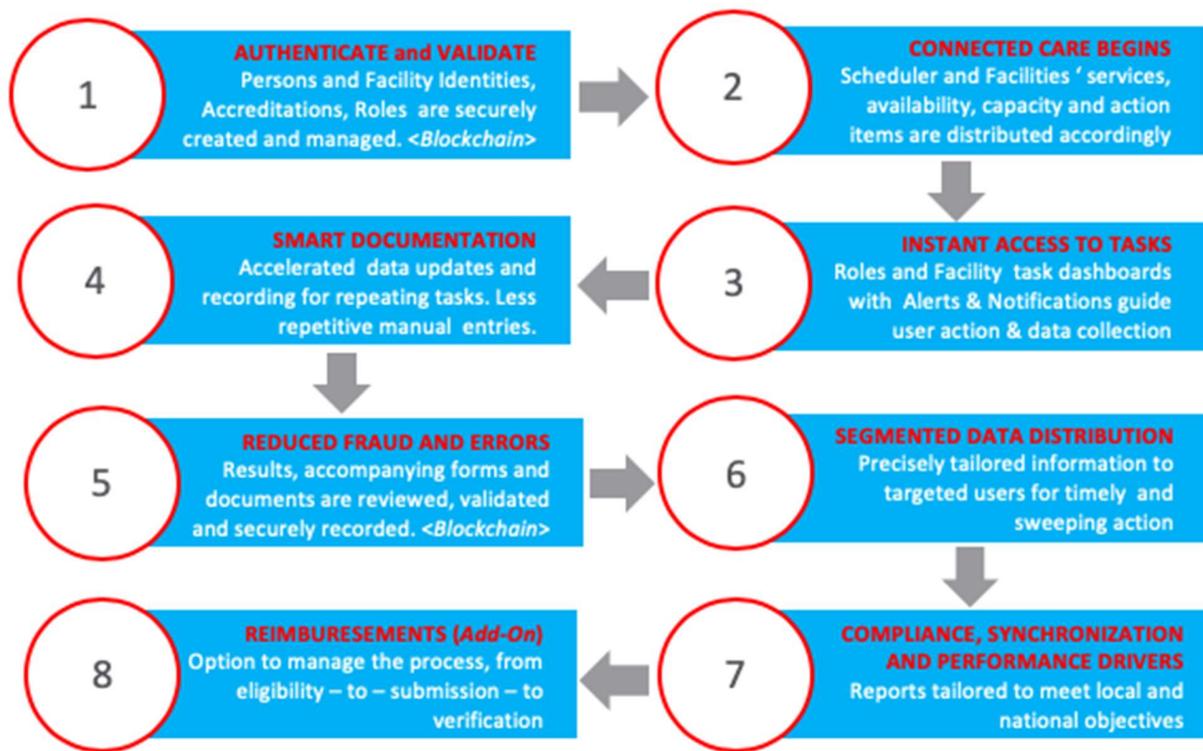

- **Manage** the local and national risk of virus spread and overwhelming the healthcare services system,
- **Automate** information sharing across, collaborating organizations and service units to focus on what really matters vs. what's simply interesting,
- **Assemble and Extract data to obtain maximum value for:**

- **Decision-makers and operators** to stay relevant and on-track
 - **Process Governance** across service workflows through Alerts and Notifications, Cross-facility Schedule and Capacity Planning, Patient Monitoring, Validations, Approvals and Publishing.
- **Comply and Complement** government digital transformation initiatives and technologies for health services delivery, data management and services delivery reimbursement programs.

- A verifiable ledger of Covid 19-related events about a person.
- Streamlines workflows with best practices, automation, alerts and notifications
- Bridges workflows between facility(ies) and its frontline professionals
- Drives an accurate, consistent and efficient process to collect, access, maintain, store and publish reports on.
- Includes Reporting Metrics and Analytics for essential operations, services, and reimbursement programs
- Designed for Data Privacy, Protection, Security, and Role-based work.

How medixWATCH drives operational efficiency and consistency in data collection – “connected care”

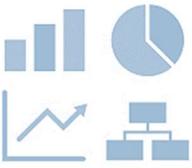

| STAGES (POINT OF SERVICE) | MODULES | SOME FEATURES | Point of Entry | Holding Areas | Community Isolation Units (CIU) | Testing Lab Partners | Referral Hospitals | Office LGU |

* eClaims is an independent platform complementing medixWATCH. (Charged separately)

Metrics & Analytics (Reports)

medixWATCH seeks to sustain LGU’s operational efficiency, consistency and quality in its data collection, maintenance and application efforts.

| | |
|--|---|
|  | <p>The current health crisis highlighted the need for timely, relevant information in order for government to improve its ability to serve the public. Automation of information sharing across collaborating LGU organizations sets the foundation for a metrics and analytics</p> |
| <p>To effectively address pandemic-related challenges, medixWATCH brings coherence in processes and workflows to achieve an LGU’s Covid 19 objectives. Insufficient focus on these presents significant challenges to all those responsible.</p> | |

| OBJECTIVE | WHAT IS POSSIBLE * | PLAN & ACT: HOW TO MAKE IT HAPPEN |
|---|--|--|
| Accountability | <ul style="list-style-type: none"> Schedule and service delivery documentation Reconcile pandemic-induced regulatory flexibilities & waivers | <p>Normalize and monitor information and documentation transfers for reporting, consolidation, performance monitoring, and audit-readiness</p> <p>Define, optimize and monitor clear reimbursement paths through integration with TTSI’s eClaims engine.</p> |
| Capability & Capacity Building | <ul style="list-style-type: none"> Real-time dashboards Tracking report summaries | <p>Our operator dashboards help decision makers and those on site optimize utilization of existing resources, anticipate or identify gaps and opportunities for augmentation.</p> |
| Data-driven thematic maps | <ul style="list-style-type: none"> Depict intensity of data at geographical points Optimize service distribution | <p>Visualize vital operational data points in and around your locale to gain insight for pro-active and accelerated service responses.</p> |
| Performance Improvement | <ul style="list-style-type: none"> Process metrics at various service delivery stages or point-of-service | <p>Move beyond the traditional silos. Establish end-to-end process milestones and metrics for the different stages in operations to identify bottlenecks and “flaws in the flow”.</p> |

In crisis communications, don’t settle for half the story.

Operations and Data matter

Why does this unit take longer to complete a cycle than the composite average across all the units in my organization?

How does my unit performance compare to the rest of the organization? The region? The country?
